

Security Engineering on AWS

Course: **00107**

Filter: **Beginner**

Duration: **20 hours**

Category:: **Cloud Security**

Price: **2800,00 €**

About Course

This course demonstrates how to efficiently use AWS security services to stay secure in the AWS Cloud. The course focuses on the security practices that AWS recommends for enhancing the security of your data and systems in the cloud. The course highlights the security features of AWS key services including compute, storage, networking, and database services. You will also learn how to leverage AWS services and tools for automation, continuous monitoring and logging, and responding to security incidents.

What you'll learn

- Assimilate and leverage the AWS shared security responsibility model
- vArchitect and build AWS application infrastructures that are protected against the most common security threats
- Protect data at rest and in transit with encryption
- Apply security checks and analyses in an automated and reproducible manner
- Configure authentication for resources and applications in the AWS Cloud
- Gain insight into events by capturing, monitoring, processing, and analyzing logs
- Identify and mitigate incoming threats against applications and data
- Perform security assessments to ensure that common vulnerabilities are patched and security best practices are applied

Targeted audience

- Security engineers
- Security architects

- Security operations
- Information security

Pre-requisites

- AWS Cloud Practitioner Essentials
- AWS Security Fundamentals
- Architecting on AWS
- Working knowledge of IT security practices and infrastructure concepts
- Familiarity with cloud computing concepts

Curriculum

Module 1: Identifying Entry Points on AWS

-

Module 2: Security Considerations: Web Application Environments

-

Module 3: Application Security

-

Module 4: Securing Networking Communications – Part 1

-

Module 5: Data Security

-

Module 6: Security Considerations: Hybrid Environments

-

Module 7: Monitoring and Collecting Logs on AWS

-

Module 8: Processing Logs on AWS

-

Module 9: Securing Networking Communications – Part 2

-

Module 10: Out-Of-Region Protection

-

Module 11: Account Management on AWS

-

Module 12: Security Considerations: Serverless Environments

-

Module 13: Secrets Management on AWS

-

Module 14: Automating Security on AWS

-

Module 15: Threat Detection and Sensitive Data Monitoring

-
