

Certified CMMC Assessor Training (CCA)

Course: **00047**

Filter: **Beginner**

Duration: **20 hours**

Category:: **Cyber Security**

Price: **3000,00 €**

About Course

This training program provides job training for individuals and assessment teams to become a Certified CMMC Assessor (CCA) and take the Certified CMMC Professional (CCP) exam. The course covers the requirements for assessing the CMMC Level and using a workflow to improve efficiency during an Assessment. The CCA plays a critical role in ensuring that Department of Defense (DoD) suppliers and service providers comply with the cybersecurity requirements set by the Secretary of Defense. The CMMC program aims to provide a standard model for evaluating organizations that wish to provide products and services to the DoD. These organizations are required to demonstrate their cybersecurity competency and compliance under the CMMC program. The course also covers the handling of Controlled Unclassified Information (CUI). The training solutions are delivered through virtual instructor-led training and virtual classrooms using real-time delivery methods. Our training programs cater to the type of training that suits the team member's needs. The course also provides employee training to improve the overall performance of the team. This job training is in compliance with the Defense Federal Acquisition Regulation (DFAR) cybersecurity requirements.

What you'll learn

- Protect CUI with the CMMC program
- Establish the key elements of your responsibilities as a professional CMMC Assessor.
- Work through an Assessment
- Validate the context and scope of a Level 2 CMMC Assessment.
- Assess the practices in all 14 domains derived from NIST SP 800-171.

Pre-requisites

- To ensure your success in this course, you must have the foundational cybersecurity knowledge of a Certified CMMC Professional, which you can obtain by taking the following course and exam:
- Cybersecurity Maturity Model Certification (CMMC) Training Course

Curriculum

Module 1: Protecting CUI with the CMMC Program

- Protect Controlled Unclassified Information
- Utilize the CMMC Source Documents

Module 2: Being an Assessor

- Identify Assessment Roles and Responsibilities
- Establish an Assessor Mindset
- Determine the OSC's Cybersecurity Environment

Module 3: Working Through an Assessment

- Identify Assessment Flow and Milestone Events
- Prepare to Work with the OSC
- Formalize the Plan
- Assess the Evidence
- Handle Non-Conformity Issues
- Finalize the Assessment

Module 4: Validating the Scope of a CMMC Assessment

- Define Scope Fundamentals
- Categorize the Assets
- Determine the OSC Context

- Define ESPs
- Validate the Assessment Scope

Module 5: Assessing the AC Practices

- Evaluate the AC Practices
- Identify AC Connections and Considerations

Module 6: Assessing the AT Practices

- Evaluate the AT Practices
- Identify AT Connections and Considerations

Module 7: Assessing the AU Practices

- Evaluate the AU Practices
- Identify AU Connections and Considerations

Module 8: Assessing the CA Practices

- Evaluate the CA Practices
- Identify CA Connections and Considerations

Module 9: Assessing the CM Practices

- Evaluate the CM Practices
- Identify CM Connections and Considerations

Module 10: Assessing the IA Practices

- Evaluate the IA Practices
- Identify IA Connections and Considerations

Module 11: Assessing the IR Practices

- Evaluate the IR Practices
- Identify IR Connections and Considerations

Module 12: Assessing the MA Practices

- Evaluate the MA Practices
- Identify MA Connections and Considerations

Module 13: Assessing the MP Practices

- Evaluate the MP Practices
- Identify MP Connections and Considerations

Module 14: Assessing the PE Practices

- Evaluate the PE Practices
- Identify PE Connections and Considerations

Module 15: Assessing the PS Practices

- Evaluate the PS Practices
- Identify PS Connections and Considerations

Module 16: Assessing the RA Practices

- Evaluate the RA Practices
- Identify RA Connections and Considerations

Module 17: Assessing the SC Practices

- Evaluate the SC Practices
- Identify SC Connections and Considerations

Module 18: Assessing the SI Practices

- Evaluate the SI Practices
- Identify SI Connections and Considerations
