About Course

Regardless of your computer experience, this course will help you become more aware of technology-related risks and what you can do to protect yourself and your organization from them. It will also cover methods used to open your network to vulnerabilities and potential breaches. In addition, the course will help ensure data security on computers, mobile devices, networks, the Internet, and the cloud.among other related topics. The course helps learners prepare for the Microsoft Information Protection Administrator exam (SC-400).
