About Course

It has become even clearer that organizations with corporate and IT governance policies and processes in place are better able to adapt quickly to changing situations and maintain productivity. This official ISACA CGEIT certification course prepares you for the exam to become Certified in the Governance of Enterprise IT. It provides you with in-depth coverage on the GEIT Framework. As part of this 2020 updated ISACA CGEIT exam content outline, the exam domains have been consolidated from five to four, and include the governance of enterprise IT, IT resources, benefits realization, and risk optimization. This course is designed specifically for Senior Managers, CIOs, Compliance and IS Professionals, and those looking for more efficient and effective practices to manage IT. The role of Enterprise IT Governance is not always clear to organizations looking to manage risk to and in an organization. Achieve this in-demand certification and demonstrate your ability to manage IT resources.

What you'll learn

- Prepare for and pass the Certified Governance Enterprise IT (CGEIT) exam.
- Define, establish, and manage a framework for the governance of enterprise IT.
- Enable and support the achievement of enterprise objectives.
- Ensure that IT-enabled investments are managed to deliver optimized business benefits.
- Establish an IT risk management framework to identify, analyze, mitigate, manage, monitor, and communicate IT-related business risk.
- Optimize IT resources.

Pre-requisites

- To earn CGEIT certification, you must pass the CGEIT exam and demonstrate five or more years of experience managing, serving in an advisory or oversight role, and/or otherwise supporting the governance of the IT-related contribution to an enterprise is required to apply for certification. This experience is defined specifically by the domains and task statements described in the CGEIT Job Practice.
