About Course

The EC-Council Certified Incident Handler (ECIH) program is designed to provide the fundamental skills to handle and respond to computer security incidents in an information system while preparing you to pass the ECIH exam. The course provides incident response training by addressing various underlying principles and techniques for detecting and responding to current and emerging computer security threats

What you'll learn

- After attending the course, you will be able to create incident handling and response policies and deal with various types of computer security incidents.

Pre-requisites

- 1 year of information security experience
- Attendees must be at least 18 years of age
- You can request your voucher from AkasiLearning at any time after you complete the course
- This is an EC-Council certification prep course. Click here to view more EC-Council certification prep training ›
